1. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-18 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Applicant's multiple use of the terminology "and/or" throughout the claims fails to positively set forth the claimed invention (claims 1,2,3,8,9,12-17). Also, the term "for example" fails to positively set forth the claimed invention (claims 3,7,10).

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-4,8-11 are rejected under 35 U.S.C. 102(b) as being anticipated by Elgaard WO 03/051067. Elgaard discloses in column 13 lines 20 to column 15 lines 12 discloses a mobile phone system in which out going and incoming communications operate in real time. There is disclosed a control unit and a modem which operates to transmit and receive commands.

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Mikurak 2006/0178918 discloses multiplexing multiple signals.
